

for 2 percussionists

Erik Carlson

For 2 low-tuned drums softly rolled with soft mallets.
The drums should sound as similar as possible.

Players can make their own score.

Generate 2 Orders for the numbers 1 - 50.

Make sure that for the number in every position N in Order 2 (O2[N]),
that $O2[N] < O1[N] + O1[N+1]$.

The numbers in Order 1 give the time between the beginnings of new notes (at tempo 120),
and the corresponding number in Order 2 gives the duration of that note.
Players alternate entrances.

A sample score is below.

♩ = 120

20

39

59

78

98

118
