

For 2 violas
Erik Carlson
2017

Both violists play from the same list of pitches, randomly generated over a 2-octave range C3 - B4.

Viola 1 plays each pitch in order, one pitch per bow, 10 seconds per note, very softly, playing as legato as possible (large leaps may need a very slight breath).

Viola 2 also plays each pitch in order, but joining Viola 1 for just part of each note, very softly, starting and stopping almost unnoticeably.

Viola 2's start times are randomly generated, anywhere from 0.0 seconds to 8.0 seconds from the beginning of each note, and ending anywhere from 2.0 seconds after the start of Viola 2's note to the end of Viola 1's note.

Play for as long as desired.
