

for french horn
Erik Carlson
2016

A series of notes separated by rests.

A single pitch for the piece is chosen in the middle range of the instrument.

Each time the note is played, the duration gets longer. The duration of the first note is $\frac{1}{8}$ of a second, and each time the note is played the duration increases by $\frac{1}{8}$ of a second. Rest for as long as desired between each note (with the suggestion that rest-durations be varied).

The dynamic is mf or f.
Play for as long as desired.
